In addition to the software application, the user may have a spreadsheet or database application, such as Microsoft Excel, or a word processor application, such as Microsoft Word or LibreOffice Writer. These may be used to assist in drafting or creating printed documents. A common assumption of many users of CAD is that they need a good graphics display. AutoCAD is an excellent choice of CAD program for professionals who need good precision and accuracy. However, AutoCAD is no substitute for visualizing, analyzing, and drafting data on paper. Many people who use AutoCAD assume that they are able to use the program for all their drafting needs. However, there are also many tasks not readily achievable with AutoCAD. A user can install a draft version of the software application on a computer and all users can log in with their account.
